

# How to use an AED

Person may look like they are having a seizure, gasping for air, or may appear unconscious or nonresponsive.

## STEP 1

Get the AED.  
Turn on the AED by  
pressing the "ON" button.

## STEP 2

Once the AED is on, voice  
prompt will direct you to  
place the pads on the person.

## STEP 3

The device will analyze the  
person's heart and determine  
if a shock is needed. NO human  
decision making is needed.
